Hello
Django

Django - Hello

Django é um framework web Python de alto nível que incentiva o desenvolvimento rápido e um design limpo e pragmático.

Desenvolvido por desenvolvedores experientes, ele cuida de grande parte da complexidade do desenvolvimento web, para que você possa se concentrar em escrever seu aplicativo sem precisar reinventar a roda.

É gratuito e de código aberto.

- Incrivelmente rápido.
 - ❑ O Django foi projetado para ajudar os desenvolvedores a levar os aplicativos do conceito à conclusão o mais rápido possível.
- Confortavelmente seguro.
 - ❑ O Django leva a segurança a sério e ajuda os desenvolvedores a evitar muitos erros comuns de segurança.
- Extremamente escalável.
 - ❑ Alguns dos sites mais movimentados da web aproveitam a capacidade do Django de escalar com rapidez e flexibilidade.

Para ver todos os comando do Django

digitar no powershell

Django-admin --help

```
nothing to commit, working tree clean
• (venv) PS F:\Senai\2025 - 2\FIC\Python como framework\ProjetoDjangoPY> django-admin --help

Type 'django-admin help <subcommand>' for help on a specific subcommand.

Available subcommands:

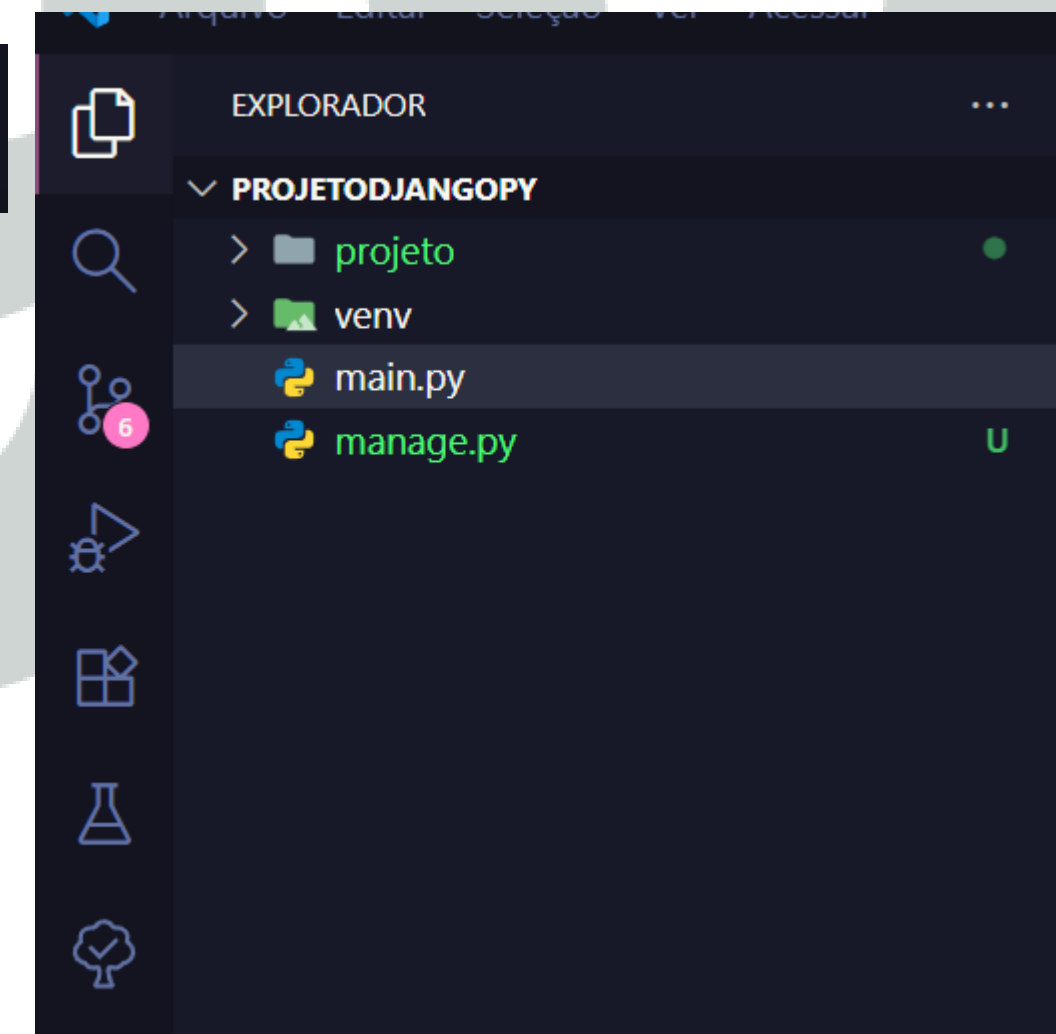

[django]
  check
  compilemessages
  createcachetable
  dbshell
  diffsettings
  dumpdata
  flush
```

Django - Hello

Comandos que vamos utilizar
digitar no powershell

Django-admin startproject projeto .

```
• (venv) PS F:\Senai\2025 - 2\FIC\Python como framework\ProjetoDjangoPY> django-admin startproject projeto .  
○ (venv) PS F:\Senai\2025 - 2\FIC\Python como framework\ProjetoDjangoPY> 
```

Django - Hello

Rodar os servidor

Comandos que vamos utilizar

digitar no powershell

python manage.py runserver

```
(venv) PS F:\Senai\2025 - 2\FIC\Python como framework\ProjetoDjangoPY> python manage.py runserver
System check identified no issues (0 silenced).

You have 18 unapplied migration(s). Your project may not work properly until you apply the migrations for a
pp(s): admin, auth, contenttypes, sessions.
Run 'python manage.py migrate' to apply them.
October 20, 2025 - 20:03:59
Django version 5.2.7, using settings 'projeto.settings'
Starting development server at http://127.0.0.1:8000/
Quit the server with CTRL-BREAK.

WARNING: This is a development server. Do not use it in a production setting. Use a production WSGI or ASGI
server instead.
For more information on production servers see: https://docs.djangoproject.com/en/5.2/howto/deployment/
```

Clicar no link
para abrir o
servidor

The install worked successfully! Congratulations!

View [release notes](#) for Django 5.2

You are seeing this page because `DEBUG=True` is in your settings file and you have not configured any URLs.

Após criar e rodar o servidor, aparece um monte de arquivos para subir no github, vamos tirar boa parte destes arquivos

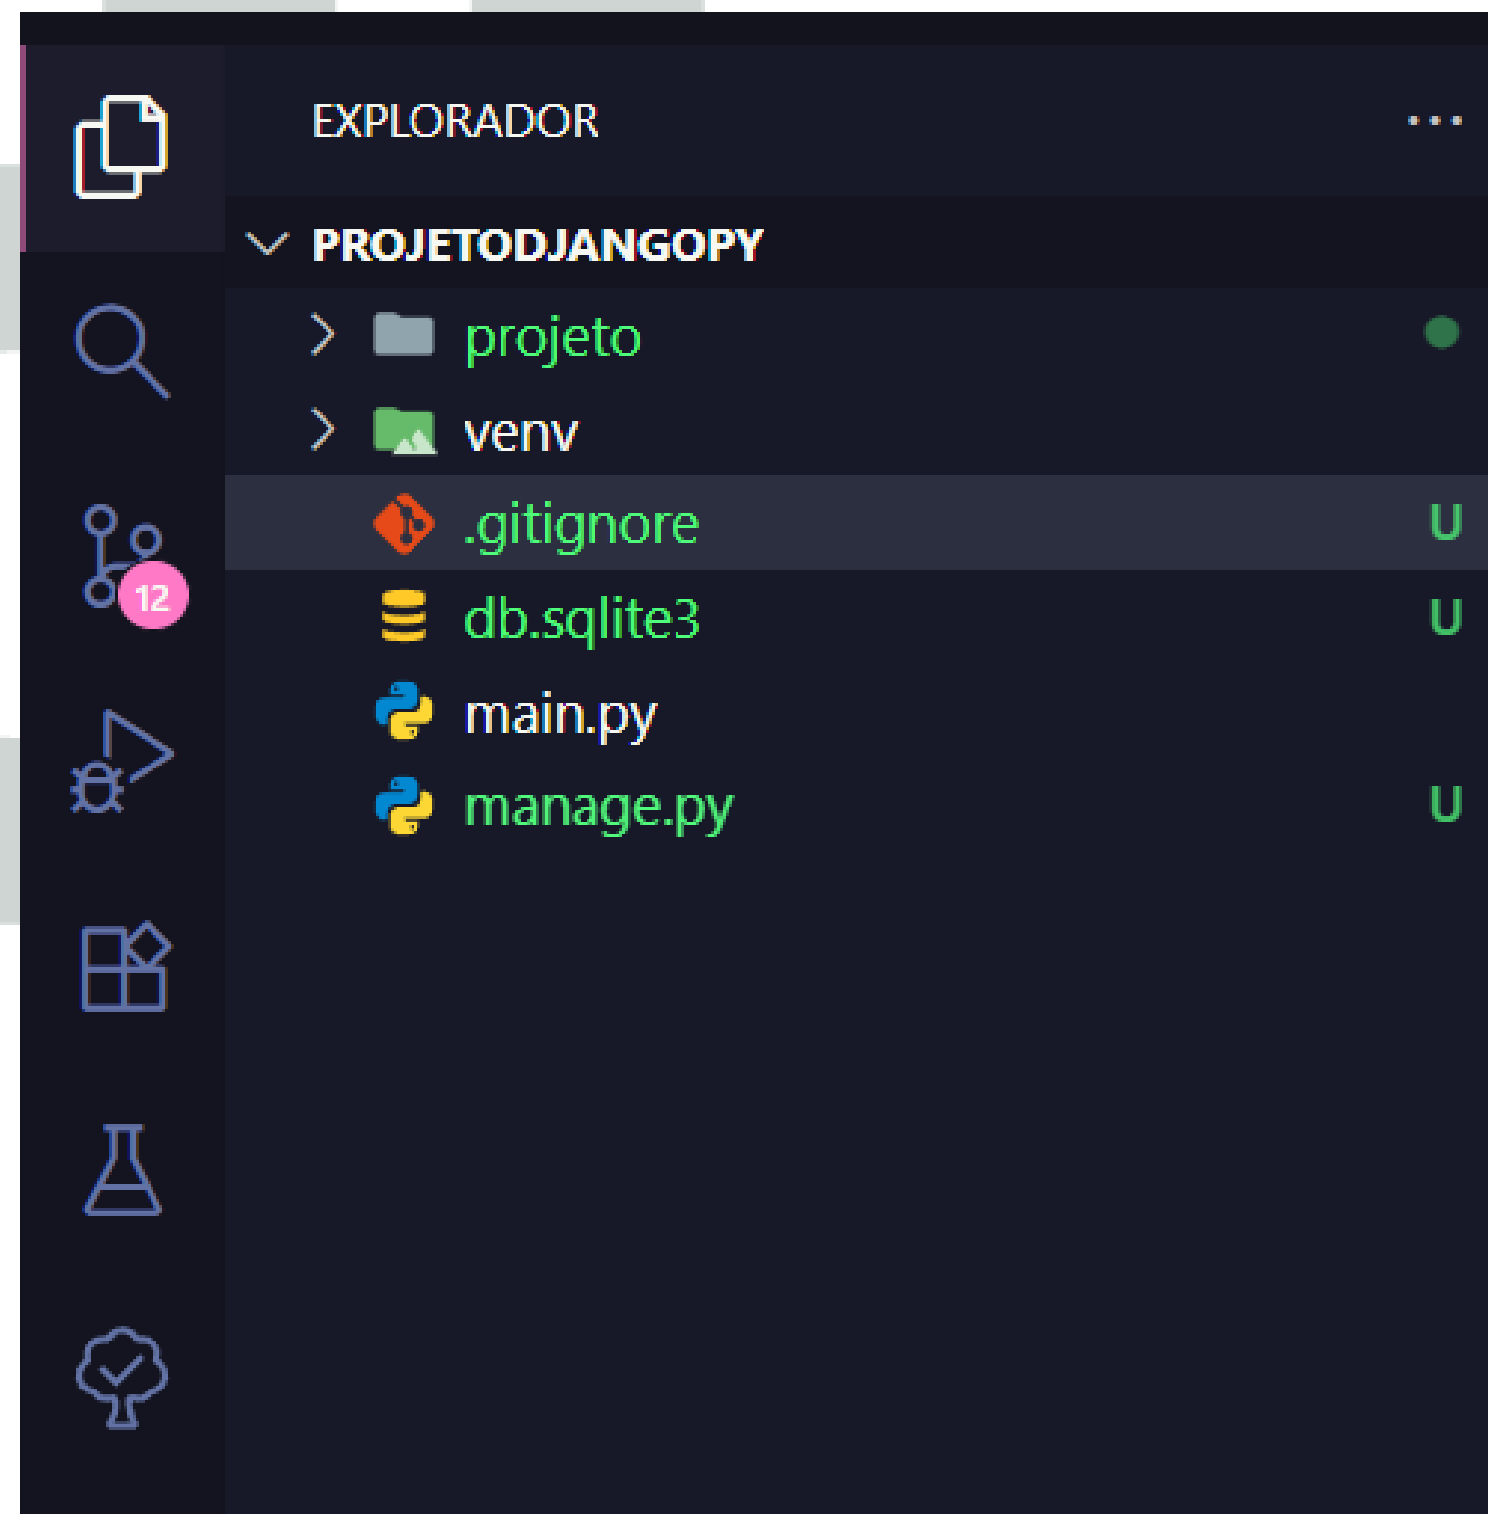

Criar um arquivo .gitignore, na arvore de projetos

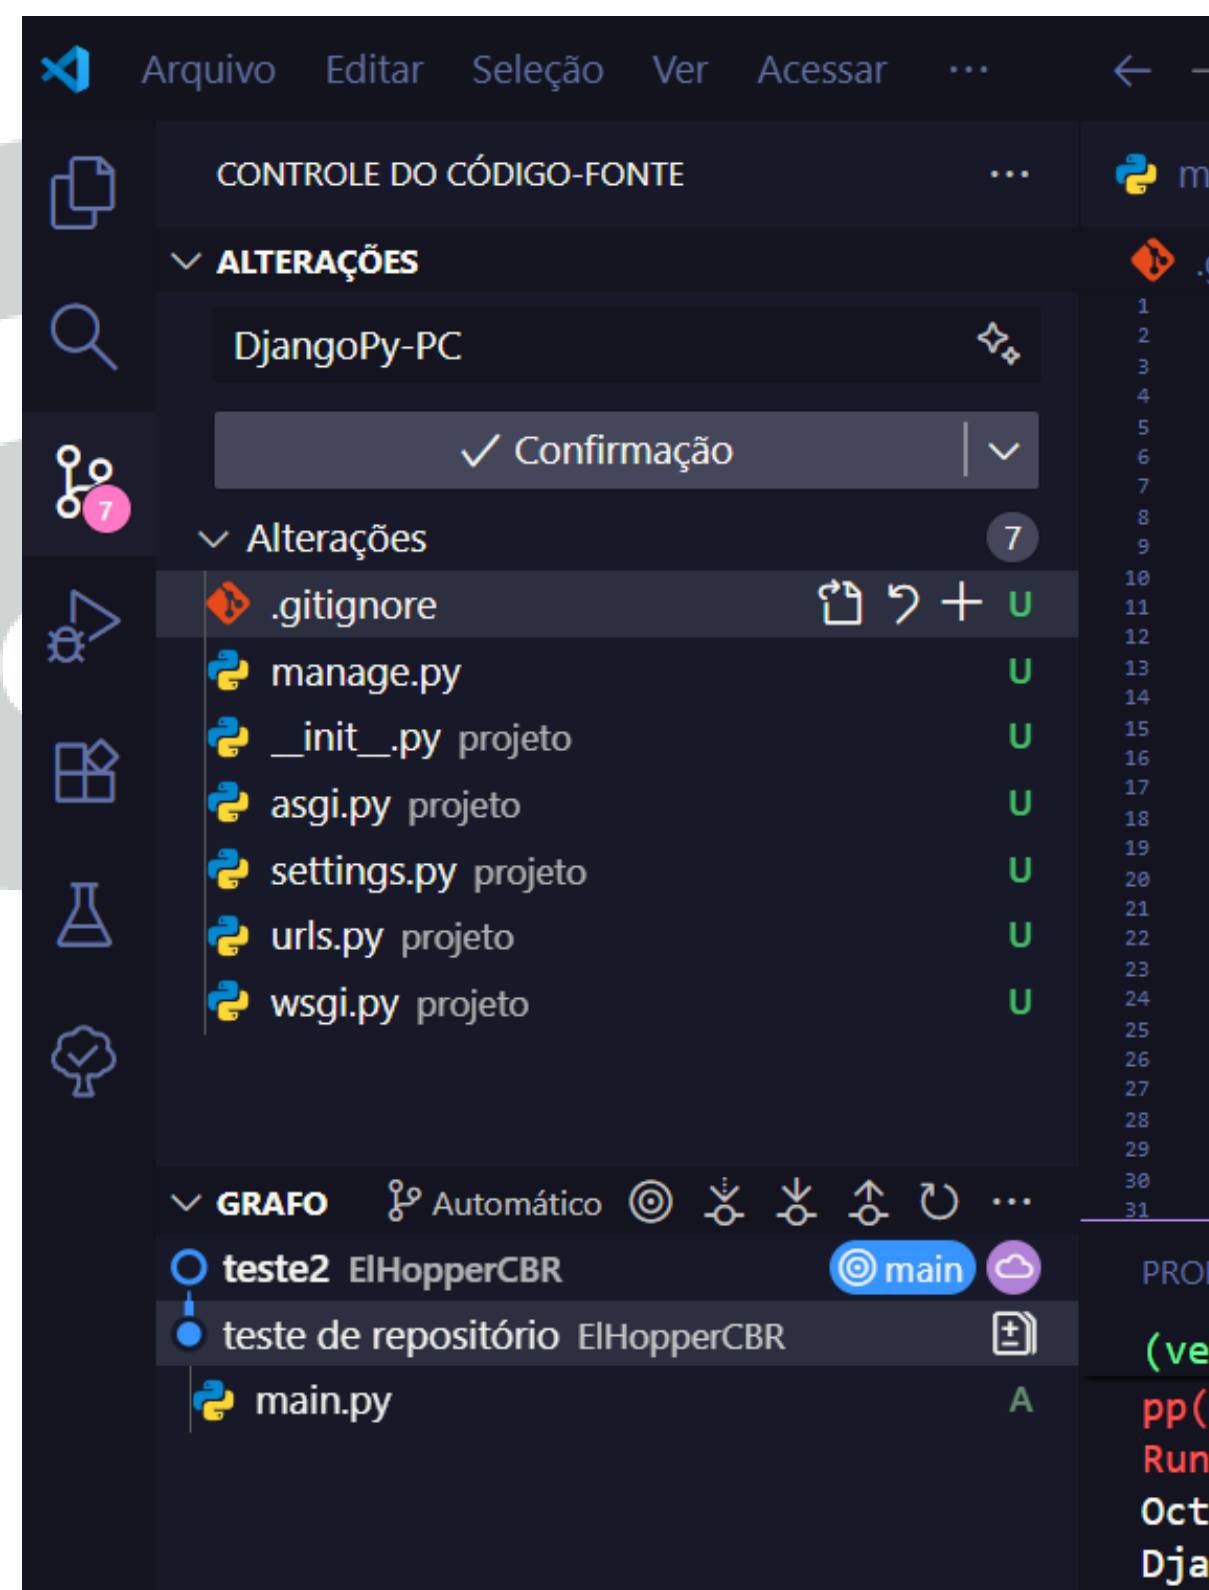

Django - Repositorio

Criar um arquivo `.gitignore`, na arvore de projetos e colocar o seguinte código

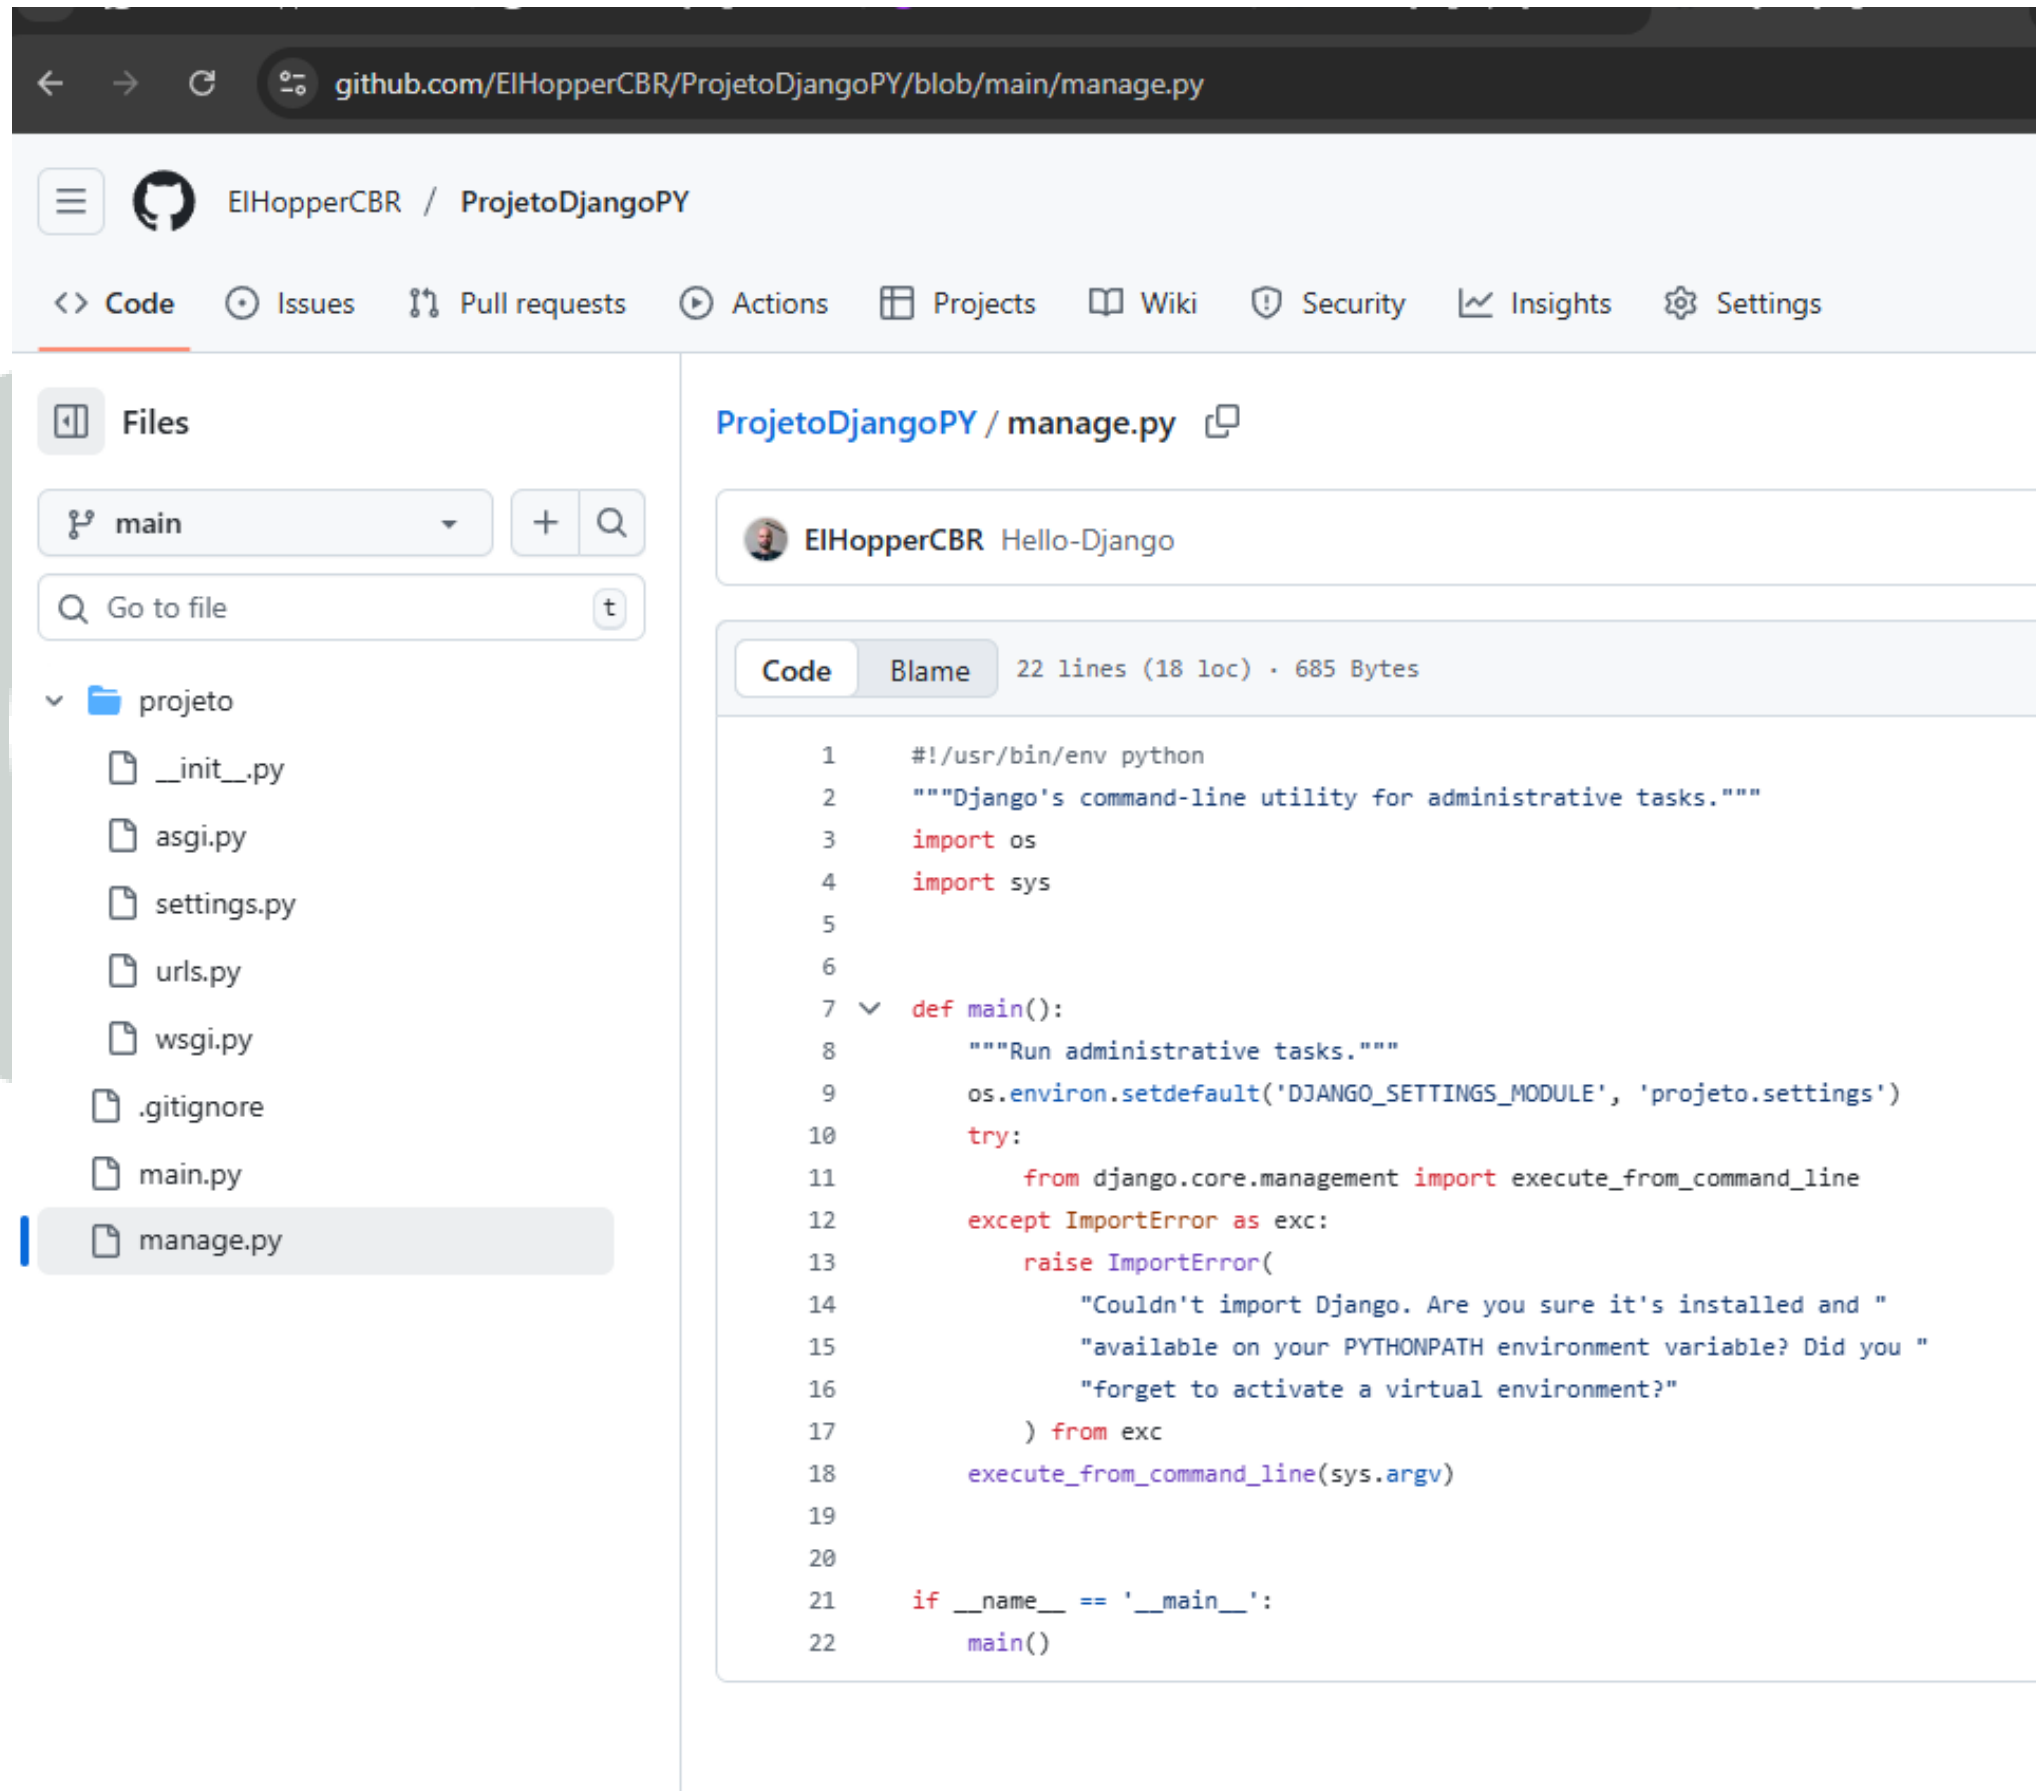

```
.gitignore
1  # Django -#
2  *.log
3  *.pot
4  *.pyc
5  __pycache__
6  db.sqlite3
7  media
8
9  # Backup files -#
10 *.bak
11
12 # If you are using PyCharm -#
13 .idea/**/workspace.xml
14 .idea/**/tasks.xml
15 .idea/dictionaries
16 .idea/**/dataSources/
17 .idea/**/dataSources.ids
18 .idea/**/dataSources.xml
19 .idea/**/dataSources.local.xml
20 .idea/**/sqlDataSources.xml
21 .idea/**/dynamic.xml
22 .idea/**/uiDesigner.xml
23 .idea/**/gradle.xml
24 .idea/**/libraries
25 *.iws /out/
26
27 # Python -#
28 *.py[cod]
29 *$py.class
30
```

Com isso somente 7 arquivos para subir na nuvem
